

Workshop

Medication Review in Hospital Setting

Moira Kinnear & Ulrika Gillespie

The workshop aims to help participants develop medication review practices in their own hospitals

Learning Objectives;

- Describe the challenges in working collaboratively in multidisciplinary teams to ensure the appropriate patients receive medication review
- Consider implementation strategies appropriate to their own areas of practice
- Plan the application of change management principles to progress service development in their own institutions

Task:

Reflect on your own practices and current status in your own institutions/country. Share your own experiences with the group.

Try to work through Kotter's 8 steps to consider actions to take to help drive services forward

Depending on workshop numbers, discussion will either be in small groups or one larger group.
